

# APH: an automatic plastic hunter

The ocean constitutes over 90% of the habitable space on the planet. Unfortunately 8 million tons of plastic waste enter the oceans each year. Thanks to an automatic device plastic hunter called APH we could preserve the marine biodiversity all around the world.

## ★ WHY IT IS IMPORTANT TO PRESERVE MARINE BIODIVERSITY ?

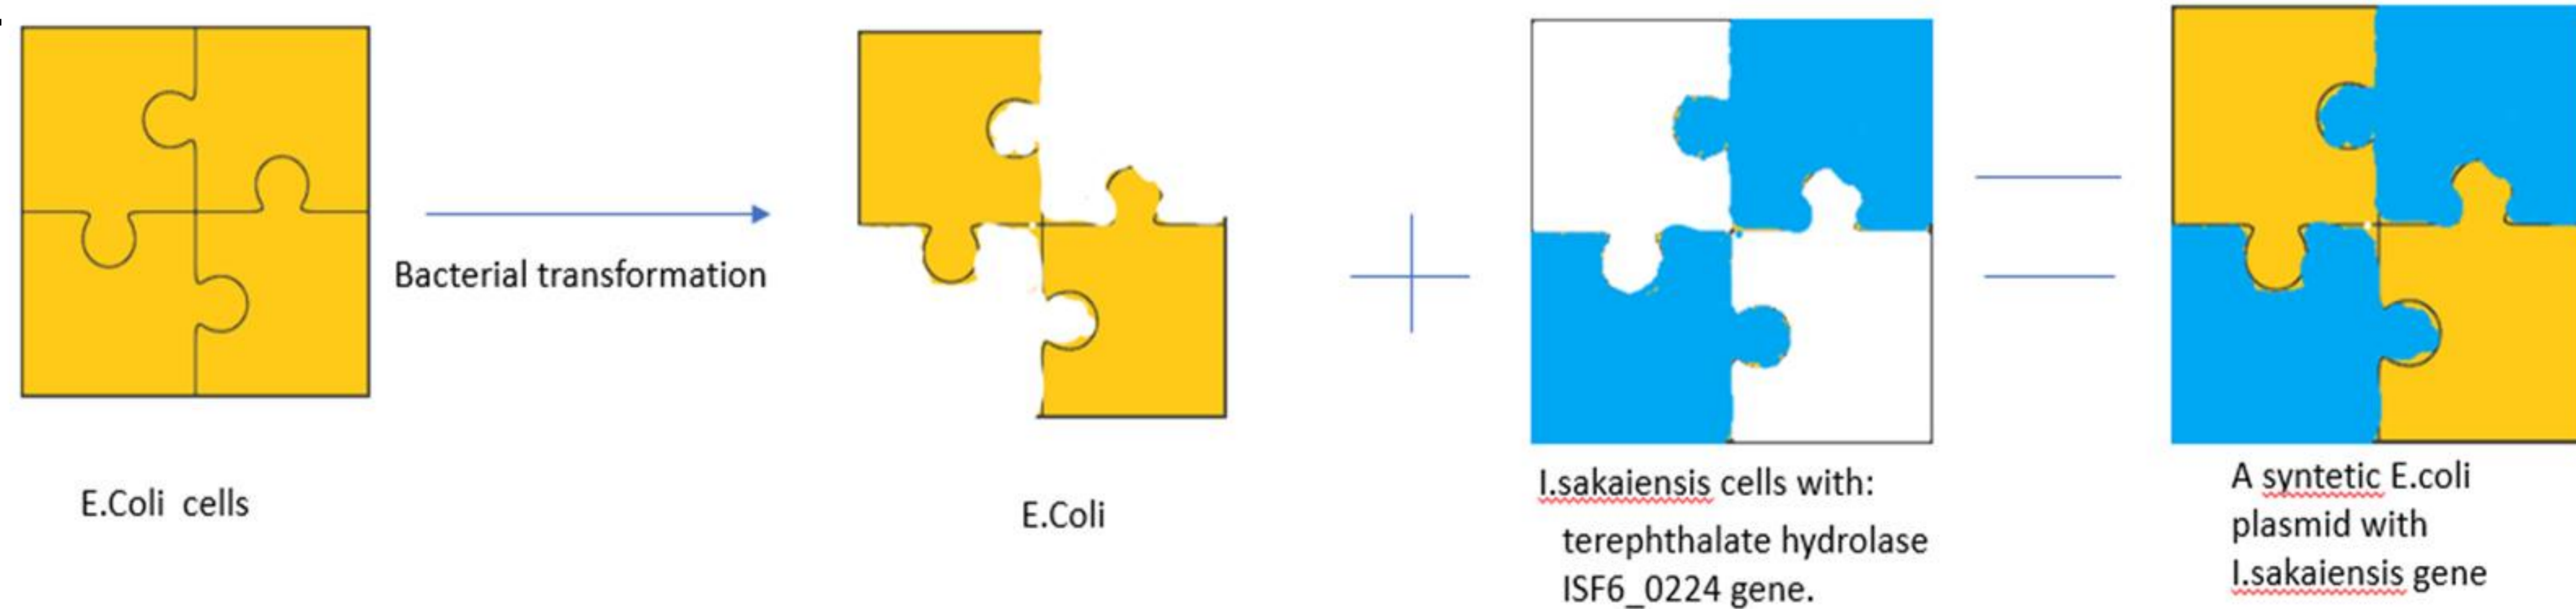

More than 50 species of fish have been found eating plastic waste.

## ★ HOW TO REMOVE PLASTIC FROM THE OCEANS AND SAVE THE MARINE ECOSYSTEM ?

We aimed to create an APH device to reduce in a sustainable way the plastic in the ocean using bacterias.
